

ATLAS MOBILE X-RAY SYSTEM

Introducing ATLAS, the most powerful Mobile X-ray System on the market. Designed for the inspection of components that otherwise can't be inspected in a shielded bunker. The ATLAS combines the power of a stationary unit with the freedom of mobility.

POWER

With a 4.5kW output, the ATLAS is the most powerful mobile X-ray system on the market. Leading to faster inspection times, better image quality, and enhanced overall productivity.

VERSATILITY

The ATLAS can be configured for a multitude of specific applications and accepts all Unipolar tubes. The ATLAS is easily liftable by crane and it's IP54 rating protects all internal electronics from water or dust ingress.

FEATURES

- ✓ Plug & Play
- ✓ 4500W Output
- ✓ Rear 360° Movement
- ✓ IP54 Rating for Electronics
- ✓ 100kV, 160kV, 225kV Models
- ✓ Integrated Safety Circuit
- ✓ Accepts all Unipolar Tubes
- ✓ All Components Field Replaceable
- ✓ Remote Controller

SERVICE & REPAIR

The modular design of the ATLAS allows for all components to be field replaceable in under 60 minutes. With access to global repair centers, the ATLAS ensures faster repair times resulting in decreased system downtime.

MULTI-TOOL

The ATLAS comes equipped with three cushioned tube cradles and optional quick disconnect cable flanges. This allows for seamless tube swapping across various applications. The innovative design not only minimizes downtime but also increases productivity.

	ATLAS 160	ATLAS 225
Height x Width	50" x 30"	50" x 30"
Weight	950lbs	1050lbs
HV Adjustment	7.5 - 160kV	10-225kV
mA Adjustment	0 - 45mA	0 - 30mA
Input Voltage	208-265VAC	208-265VAC
Max Power	4500W	4500W
IP Rating	IP54	IP54
